

PROJECT DOCUMENTATION

1. TITLE PAGE

- **Project Title:** Personal Portfolio Web Application
- **Student Name:** Rohan Ahmed
- **Internship / Track Domain:** Web Development
- **Task Number:** Task 1
- **Institution:** University of Management and Technology (UMT), Lahore
- **Git-hub Repository Link:** <https://github.com/rohan-ahmedd/My-Portfolio>

2. OBJECTIVE

The main aim of this project is to create a modern personal portfolio website by using basic web development tools such as HTML5 and CSS3. This portal works like a professional digital profile which reflects my educational background as a Cyber Security student, technical expertise in software and development projects. By building this web application, I have gained hands-on experience in web architecture, structuring and user interface.

3. TECHNOLOGIES USED

- **HTML5:** Utilized for building the semantic structure, content layout, forms, and metadata of the web pages.
- **CSS3:** Employed for presentation, custom styling, color palettes, typography, Flexbox/Grid layouts, and responsive media queries.

4. WEBSITE STRUCTURE

The project is structured logically into a single-page architecture with smooth navigation anchors

portfolio-project

- index.html (Main structural document)
- style.css (Primary design stylesheet)
- Report.pdf (Project documentation)
- images (Profile and media assets)
- screenshots (UI and section previews)

Section Breakdown:

1. **Header / Navigation Bar:** Contains brand logo and quick section links.
2. **Hero Section:** Intro area with profile picture, title, tagline, and call-to-action button.
3. **About Me:** Brief narrative on background in Cyber Security and development goals.
4. **Skills:** Categorized technical competencies presented in interactive cards.
5. **Education:** Timeline format of academic qualifications.
6. **Projects:** Grid showcasing key software and security projects with repository links.
7. **Contact:** Communication channels and a submission form interface.

8. **Footer:** Copyright information and social profile links.

5. DESIGN APPROACH

- **Clean Dark-Theme Aesthetic:** Designed with a modern dark interface to ensure contrast, readability, and a tech-focused professional feel.
- **Mobile-First Responsive Layout:** Utilized CSS Flexbox and CSS Grid to ensure elements reflow seamlessly across varying screen dimensions.
- **User-Centric Navigation:** Sticky navigation bar for immediate access to key sections without repetitive scrolling.
- **Visual Hierarchy:** Distinct section dividers, consistent font hierarchy, and hover effects on buttons and cards for an interactive feel.

6. WEBSITE FEATURES

- **Full Responsiveness:** Adapts dynamically to desktops, laptops, tablets, and smartphone views.
- **Interactive UI Elements:** Subtle CSS hover animations on project cards, skill badges, and action buttons.
- **Structured Showcase:** Organized grid layouts for skills and multi-card project displays.
- **Functional Contact Interface:** Includes labeled input fields, direct email/phone details, and location details.
- **Direct Repository Linking:** Integrated external links directly pointing to GitHub project repositories.

7. CODE SCREENSHOTS

- **HTML Code Screenshot**

A two-dimensional transformation is applied to an element through the 'transform' property. This property contains a list of transform functions similar to those allowed by SVG.

✓ Widely available across major browsers (Baseline since 2015)

Syntax: none | <transform-list>

MDN Reference

8. DESKTOP SCREENSHOTS

About Me

I'm a **BS Cyber Security** 5th semester student studying in the University of Management and Technology (**UMT**), Lahore. Although my career aspirations include becoming a cybersecurity professional, I strongly hold the view that one cannot defend a system without knowing exactly how it was created.

For this reason, I'm concentrating myself on gaining mastery in **web development, application development and programming languages**. My aim in doing so is to first lay down a strong base in software engineering. Through an understanding of how websites and software are developed, I am trying to make my technical foundation strong.

This is all part of my overall plan of action. I know that once I learn the logic and language required for creating such digital entities, moving to **advanced cybersecurity** will come easily to me. My future developer expertise will help me to analyze security issues in depth and secure the systems with confidence.

Education

Matriculation with Computer Science

Institute: TCF Secondary School
Jauharabad campus 47M.B Khushab.
Period: 2020 - 2022

Intermediate in Computer Science (ICS)

Institute: Punjab Group of Colleges
Jauharabad, Khushab.
Period: 2022 - 2024

BS Cyber Security

Institute: University Of Management
and Technology (UMT) Lahore.
Period: 2024 - 2028

Projects

**Enterprise Cyber Threat Monitoring System**

A security monitoring solution designed to detect network threats, track suspicious activity, and log real-time security events across enterprise networks.

Tech: Python, Information Security,

**SHA-256 File Integrity Monitor**

A security utility that generates and verifies SHA-256 hashes to detect unauthorized modifications or tampering in sensitive system files.

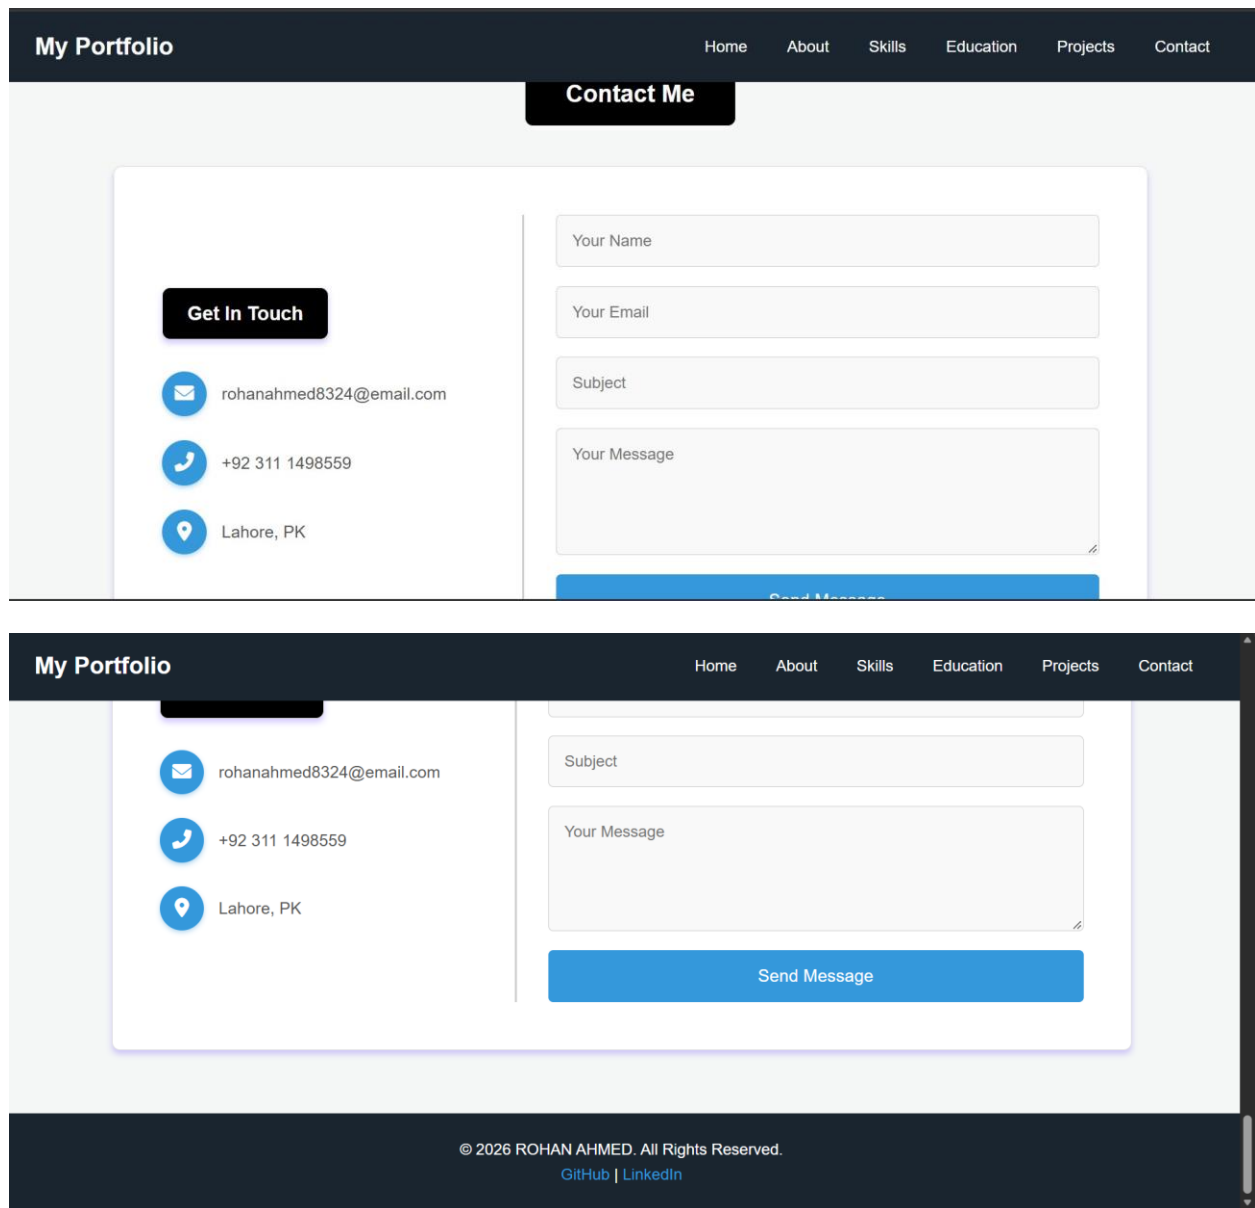

Tech: Python, SHA-256 Hashing, File Systems

[GitHub Link](#)

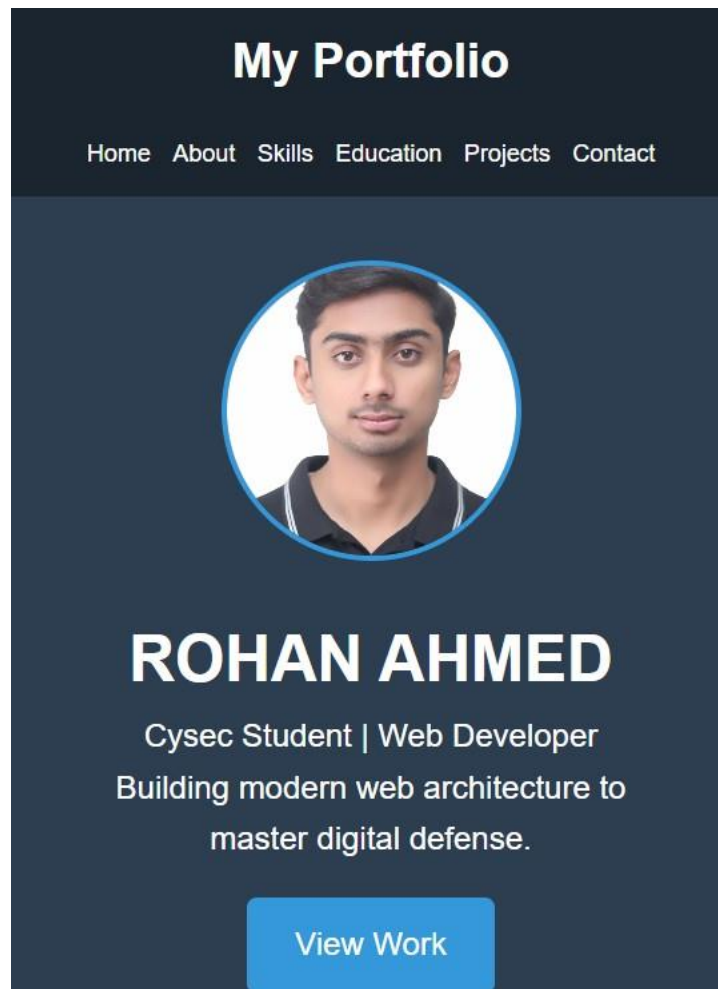

**SSH Traffic Capture & Analyzer**

A network analysis project focused on capturing live SSH packets, inspecting handshake behavior, and identifying traffic anomalies using network protocol tools.

Tech: Wireshark, Packet Analysis, Network Protocols (SSH, TCP/IP)

11. CONCLUSION

This portfolio project's successful completion indicates that I have practical knowledge of the basic web technologies, which include HTML5 and CSS3. The fact that I have built, designed, and documented this web application proves my clean background of web technology. This project is the connecting link between software development and system defense.
